-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2614

1. Applicant's arguments with respect to claims 98-101 have been considered but are moot in view of the new ground(s) of rejection prompted by the amendment.

2. Claims 100 and 101 are objected to because of the following informalities: in the penultimate line of claim 100, "setups" should be changed to -- sets up --. Appropriate correction is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 98-101 are now rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the last line of claims 98 and 100, "said information" has ambiguous antecedence because plural information types are recited earlier in the respective claims.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2614

5. Claims 98-101 are now rejected under 35 U.S.C. 102(e) as being anticipated by Yoshinobu et al.

Yoshinobu discloses a broadcast communication system that includes a headend transmitter (not shown) that generates program schedule data encoded in MPEG format (e.g. col. 8 lines 54-57), which characteristically involves a transmitting method and data structure (packet data stream in IPB frame format). Identification data is also included in the general header which the receiver recognizes as an incoming MPEG stream, and which further has program and channel ID data (e.g. Fig. 2). The transmission format information (the packet stream as it is constituted) includes program identifier data to be used by the receiving end for later processing (i.e. reproduction for ultimately displaying the received data to the user), and information about the point in time when the program is to be used for processing (i.e. the broadcast start time data segment). The receiving apparatus TV 70: Fig. 9 or 10) is used to determine the identifier data and the point-in-time information for setting up the program or data in advance as reservation data (for show or recording: e.g. col. 4 lines 1-25), the setting up to be used for processing the program or data so identified according to the received packet stream, thereby meeting claims 98 and 100.

As for claims 99 and 101, the point-in-time information is an ID tag or flag data segment (noting again Fig. 20).

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2614

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348. The examiner can normally be reached on Monday - Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (571) 272-7353.
